Vetle Drage

Software Developer | Backend & Fullstack

vetle@drage.dev | +47 992 49 841 | Oslo & Kongsberg, Norway | LinkedIn: VetleDrage | GitHub: Vetledrage | vetledrage.github.io

TECHNICAL SKILLS

Languages
Java, Kotlin, Python, JavaScript, TypeScript

Frontend
React, HTML, CSS, UI development

Backend & APIs
REST APIs, API integrations, data processing, authentication basics

AI & Data
AI agents, AI/ML fundamentals, prompt-based systems, data handling, .NET, Spring Boot, Supabase

Architecture & Security
System architecture, IT security, secure data handling

Tools
Git, GitHub, agile teamwork

EDUCATION

BSc Informatics: Programming and System Architecture | University of Oslo
Aug 2021 – 2025
Oslo, Norway

- Object-oriented programming, system architecture and IT security.
- Electives in algorithms, AI/ML, semantic technologies and team-based software projects.

Science & Math | Kongsberg Videregående skole
Aug 2018 – Jun 2021
Kongsberg, Norway

- Physics I–II, IT I–II, Mathematics R1–R2.

LANGUAGES

Norwegian: Native
English: Professional

PROFILE

Junior software developer with a BSc in Informatics from the University of Oslo and practical experience with Java, Kotlin, Python, React and TypeScript through university, internship and personal projects. Based in Oslo, and interested in backend development, API integrations, secure data handling, AI-assisted tools and scalable software architecture.

SELECTED PROJECTS

Personal Finance Application | Python / React / TypeScript / API Integration / Security

- Built a personal application for retrieving, processing and visualizing banking data.
- Focused on secure data handling, privacy and responsible handling of sensitive information.
- Developed frontend features to make financial data easier to understand and represent.

Weather App for Children | Kotlin / Java / Android / REST API / UI Design

- Developed an Android weather application using data from Meteorologisk institutt.
- Built structured app logic and data handling for fetching and processing weather data efficiently.
- Contributed to a playful and user-friendly UI tailored toward children.

LifeToolsChat | React / TypeScript / AI / Web App

- Built and deployed an AI-powered web application focused on practical AI-agent workflows.
- Worked with prompt design, user flow and AI-assisted functionality.
- Live project: lifetoolschat.vercel.app

WORK EXPERIENCE

R&D Drone Pilot | Teledyne FLIR
Sep 2026 – Present
Oslo, Norway

- Operate and test drone systems as part of R&D activities, evaluating software behavior and product performance in real-world flight scenarios.
- Identify, reproduce and report software and system issues, providing detailed feedback to developers and engineering teams.
- Discuss test results and observed behavior with the development team to support debugging, validation and product improvement.

Technical Intern | Omnimod AS
Aug 2024 – Dec 2024
Oslo, Norway

- Built and assembled parts of an AI-based packaging unit in a startup environment.
- Tested the system after developer updates, including after-hours testing to validate behavior and stability.
- Reported issues, validated product workflows and gained practical experience with debugging, testing and teamwork.

Care Worker | Kongsberg Kommune
Jun 2024 – Sep 2026
Kongsberg, Norway

- Worked in a role requiring responsibility, communication, patience and trust.
- Assisted with daily routines, meals, dressing, activities and medication routines.

Summer Employee | Meny Stortorvet
Jun 2022 – Aug 2023
Kongsberg, Norway

- Handled customer service, payment processes and age-restricted sales in a busy retail environment.

Part-Time Content Worker | The Green Deal
Oct 2021 – Dec 2021
Oslo, Norway

- Wrote product descriptions and gained experience with consumer-facing communication.
